STUDIO LARGE FORMAT CLAM

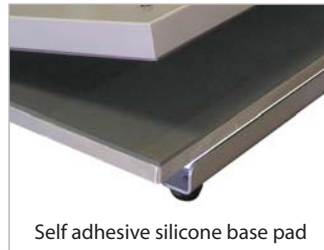

Our largest capacity Studio Collection press

Wide opening clam operation

Digital LED controllers

Self adhesive silicone base pad

Fingertip pressure control

Features:

- Wide opening clam operation
- Fingertip pressure control
- Robust steel construction for strength and durability
- Self adhesive silicone base pad
- Manufactured and tested to comply with EC safety regulations. CE labelled
- 12 month warranty on machine and heat element
- Full service/ spares support
- Manual supplied illustrates electrical wiring diagram, control unit operation, exploded diagram and parts list
- Full safety instructions

Applications:

Flex, flock, laser, sublimation, bonding, laminating, screen printing, reactivation and DTG.

Machine Info:

The Studio Large Format press is the largest model in the Studio Collection and features a heat plate measuring 100 cm x 50 cm (39.5 in x 19.5 in). It is ideal for printing onto larger items such as flags, canvas, tents, gazebos, metal, floor mats, bar mats and garments.

The dual touch pad controllers allow you to independently set the time and temperature, and a digital countdown timer to buzzer alarm makes operation easy.

Fingertip adjustable pressure controls ensure you can achieve the perfect pressure for your chosen application. Gas air struts aid the opening and closing of this press and an ergonomically designed handle makes for easy operating use.

Studio Large Format Clam

Power consumption.....	7 kW
Power supply.....	380/440 Volts AC (3-Phase E+N)
Working temperature.....	0 - 260°C
Display timer range.....	0 - 9999 sec
